

EZ DABR Filler Feeding Tool

THE STANDARD IN TIG WELDING

Learning to feed filler wire is one of the most difficult techniques to master in the TIG welding process. If you want to feed wire like other TIG artists and professionals in our industry, our CK EZ DABR Filler Feeding Tool will help you learn the technique quickly. This flexible guide tube, attached to your gloved finger, allows you to teach you the dexterity and movement necessary to feed filler metal precisely into the weld puddle. It can be easily changed to use right or left handed. Kit includes filler feeder and tips for 1/16" and 3/32" filler wire sizes.
