**THE STANDARD
IN TIG WELDING**

May 26, 2021

Dear Valued Partner,

CK Worldwide, Inc. will be implementing a price adjustment of approximately 5% starting **August 1, 2021**. CK Worldwide has not had a price change since 2019.

We strive to minimize the impact of these increases through our domestic production and negotiated pricing with our suppliers. The escalation in annual raw material costs, freight, and labor all factored into our new pricing.

Two products to note, ceramic lava nozzles and hard plastic insulated torch bodies will no longer be available once current inventory is depleted. We recommend our silica nitride “Super Cups” as an alternative to the ceramic lava nozzles.

The following products are not affected by this price change: MT200-AC/DC TIG machine, Purge Chambers, Cold Wire Feed Systems and Tungsten Grinder.

Our mission will be to continue providing the highest quality, widest range, competitively priced, most innovative TIG products available in the market today.

We will not have a mailing of price books, however the electronic price files will be made available prior to the August 1, 2021. We will do our best to provide the price files as soon as possible. You may email ck@ckworldwide.com to request the file, or simply call 1-800-426-0877 and we will place you on the list to receive the price file once available.

We appreciate your business.

Best regards,

Jeff Sharpe

President

CK Worldwide, Inc.
